

THE PROSERIES™ STORY

Scratched furniture, presents by the door... it's not easy all the time, but it's always quality time. We believe your pets deserve quality food that brings out their best. ProSeries™ is lovingly made to keep your cat and dog healthy inside and out. Pets will be pets, and we have a food for that.

Corey

nutrition company

We are a family-owned manufacturer of high quality pet foods dedicated to your pet's health and wellbeing. All of our balanced formulas are manufactured in Atlantic Canada using the highest quality ingredients and human food safety standards.

WHERE NATURE MEETS INNOVATION

THE COREYTEC™ INFUSION PROCESS

Healthy fats are an especially important ingredient in a carnivore's diet. During the CoreyTec™ Infusion Process, air is vacuumed out completely from the production chamber, forcing nutrient-rich and flavour-dense oils to permeate the kibble. This process provides a clean, dry, nutritious food with a high level of healthy fats. Which means your dog gets the same nutrition and satisfaction from a smaller portion of food.

THE COREYTEC™ FRESHNESS VALVE

Air is an ingredient we prefer to keep out of our pet food. So in combination with special packaging that protects food from air and light, our one-way valve also keeps oxygen out and food fresh. Pet food protected from oxidation delivers healthy fats and vitamins with more potency and flavour.

THE COREYTEC™ FINE GRIND FORMULA

Our aquaculture experience has taught us that the finer the grind, the better the digestibility. We grind ingredients in a specialized hammermill rotating at high speeds, producing a consistency similar to flour, before combining them into our uniquely balanced blends. Fine Grind provides denser pellets, less bag dust, better oral health, and more nutrients going in your pet than coming out.

Corey
nutrition company

Corey Nutrition bases its continued success on three guiding principles:

1. Optimum Nutrition
2. Maximum Food Safety
3. Customer Service Excellence

PROSERIES™ PUPPY
